American Railroad Journal.

New York, Saturday, May 17, 1879.

New Mexico and Southern Pacific Railroad.

At the annual meeting of the New Mexico and Southern Pacific Railroad Company, held at Clifton, N. M. on the 8th inst., the following Board of Directors was elected for the ensuing year, viz: Thomas Nickerson, Joseph Nickerson, Charles J. Paine, I. T. Burr, George B. Wilbur, John T. Morse, Jr., of Boston, Mass.; Thomas Shorlock of Cincinnati, O.; W. W. Griffin, J. L. Johnson, Henry L. Wade, of Santa Fe, N. M. The officers are: Thomas Nickerson, President; M. A. Otero, Vice President; George L. Goodwin, Treasurer; Jefferson Reynolds, Secretary; William B. Strong, General Manager.

The directors of the Atchison, Topeka and Santa Fe, with stockholders of the New Mexico and Southern Pacific Railroad, passed over the Ratan Mountains, via the "switch back," constructed under the direction of Chief Engineer A. A. Robinson, and went to the end of the track, now over 55 miles in New Mexico. The track is being laid at the rate of one and one-half miles per day, and it is expected that the road will be completed to Los Vegas by July 4, and the tunnel soon after. The workmen struck a vein of coal, 3 feet thick, on the tunnel heading on the 6th. The coal lies in white sandstone. "Uncle Dick" is doing the work over the "switch back" very successfully, daily transporting 75 to 100 loaded cars across the mountains. The party are highly pleased with their trip, the scenery, the condition of the road, its equipment and the prospects for future business of the corporation.

Metropolitan Elevated Railway Mutual Aid Association.

The object of this Association, as set forth in the Constitution adopted, is "to relieve the necessities of sick and disabled members, and benefit the families of deceased members." The officers of the Association are: Geo. D. Davis, Jr., (Cashier), President; M. J. Reed (Despatcher), 1st Vice President; Charles O. Richards (Roadmaster), 2d Vice President; Allen S. Gookin (Cashier's dep't), Treasurer; Edmund F. Bard (Gen. Ticket Dep't), Secretary. Executive Committee: David W. Marshall, (Ticket Agent); Eugene Wise, (Conductor); Geo. W. M. Leanard, (Gateman); John Hathaway, (Engineer); Wm. N. Esler, (Brakeman); Geo. Johnson, (Fireman); Thomas Hunter, (M. Carpenter). Committee on membership: G. W. De Bow, (Dispatcher); G. B. Gaseoigne, (Conductor); E. H. Haswell, (Ticket Agent); W. A. Van Orden, (Brakeman); Dennis Ryer, (Gateman); Examining Physician, Dr. Chas. H. Avery. Counsel, J. A. Hyland. Committee of Organization: Chas. O. Richards, (Roadmaster); James Marshall, (Ticket Agent); Geo. W. M. Leanard, (Gateman); John Hathaway, (Engineer); James A. Lahey, (Conductor); Geo. Johnson, (Fireman). Institution fee, $1 00; monthly dues, 25 cents. It is hoped that all employees of the road will promptly enroll their names as members at the earliest moment. Employees of "the New York Loan and Improvement Company" are entitled to full membership, and they are earnestly invited to enroll and share the benefits of the Association.

☞ The Pennsylvania railroad, in Maryland, has completed its organization by electing Maurice A. Henley president, Henry Loveridge vice president and treasurer, and Frederick Laing, Jr., secretary. Henderson's Island, at Cumberland, is to be acquired for terminal and shipping purposes.

Low Grade Ore Mining.

Gold mines worked by English Companies, like German groceries in New York, appear to thrive on a business which would speedily reduce native industry to bankruptcy. As an instance we find that the Port Philip (Australia) gold quartz mine, with its head quarters in London, mined 3,963 tons of ore during the first four weeks of this year, which returned an average of $5 70 per ton. This was mined and reduced by high priced labor at an expense of $2 80 per ton, or less than fifty per cent of its gross value. This evidence of what good machinery and efficient supervision can accomplish is an indication of how valuable may become some day the vast masses of so-called low grade gold ore, which abound in all our western mining States.

The Sierra Buttes low grade gold ore mine of California, also in English hands, with an average yield of about $6, returns good dividends to its stockholders, while mines like the Tip Top, and others we might mention, with ore running from $50 to $100 per ton, return little or nothing to their proprietors, their shares being quoted at a contemptible fraction of their face value. Among the very few notable exceptions which do credit to their management is the Plumas National, which pays large and regular dividends on $14 ore. The contrast in the quoted prices of shares of the mines we have named, is instructive. Tip Top shares, based on $50 ore, 85 cents; Plumas National, based on $12 ore, $3 70, with every probability of a sudden and early rise to $10 or more. The obvious moral for investors, to be deduced from these facts, is: Look into the management as well as into the mine before you invest.

Silver Cliff City, Colorado.

Silver Cliff City was started as a mining camp in September of last year, and now has a population of about two thousand five hundred and four hundred houses. It lies in Wet Mountain Valley, 30 miles in a southwesterly direction from Canon City, and takes its name from the remarkable cliff or bluff at whose feet it lies.

This cliff is a bold upheaval of whitish grey

porphyry streaked with dark green and black. In it there are many crevices and fissures in which horn silver is found and the whole body is saturated more or less with free silver. Some of the ore resembles and is called carbonate, but an exact definition would hardly give it that name. The immense quantity of paying ore that is found in the cliff and its vicinity insures a long and a prosperous future to Silver Cliff City.

In the short time that has elapsed since the settlement of the district no developments of any extent have been made. Among the mines which are being vigorously worked are: the Montrose which has struck some rich galena at 26 feet; Rambler, Racine Boy, Hidden Treasure, Jay Hawker, Horn Silver, La Plata Verde, John Bull and Smuggler.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS.

The accounts for the half year ended the 31st January, 1879, are now presented to the Proprietors in the usual form and on a uniform gold basis.

The following are the revenue results of the half year as compared with those of the corresponding half year to 31st January 1878.

	Jan. 31, 1878.	Jan. 31, 1879.
Gross receipts	£467,237	£387,295
Working expenses, inclusive of credits to reserve funds, being at the rate of 66.04 per cent against 67.97 per cent for the corresponding period	317,604	255,794
	£149,633	£131,501
Loss on working leased lines, interest on bonds, debenture stock, &c	100,004	103,049
	49,629	28,452
Dr. Bal. from previous yr	3,197	Cr. 747
Surplus	£46,432	£29,199

The net result of the half year's working is therefore less than that of the corresponding half year by £21,177, but compared with the half year ended 31st January, 1877, there is an improvement of £62,075. The transfers to the various reserve funds have this half year been credited on a revised basis, the details of which are given in subsequent paragraphs. From the surplus of £29,199 the Directors recommend the declaration of a dividend on the preference stock for the entire year ended 31st January, 1879, which will absorb £25,288, leaving a balance of £3,912 to be carried forward to next half year.

The gross receipts on the main line and branches compare as follows with those of the corresponding half year:

Decrease in through freight earnings		£60,304
Decrease in local freight earnings		11,570
Decrease in through passenger earnings		5,305
Decrease in local passenger earnings		4,480
		£81,659
Inc. in through live stock earnings	£150	
Inc. in local live stock earnings	808	
Inc. in mails, express freight, rents, &c.	760	
		1,717
Total decrease		£79,942

During the latter part of the half year the rates for through freight traffic from the west have been in a very unsettled state. Meetings of the representatives of the through trunk lines have been held from time to time, with the object of devising some plan to obviate the competition which has proved so detrimental to all interests concerned, but the Directors regret that no definite arrangement has at present been come to between those companies. The average rate received by the company on through freight traffic has been $\frac{1}{4}$ths of a cent per ton per mile, which, although an improvement on the preceding half year, is considerably less than the average rate for the half year ended January 31, 1878. To low rates, and to the diminution in the volume of traffic over this company's line under the Scott award, the decrease of the gross receipts is mainly attributable.

The working expenses, however, have also been greatly reduced. The following table shows the low train mileage rate which has now been reached:

Half years ended	Earnings. Per train mile. s.	d.	Cash working expenses, excluding reserve and other funds. Per train. mile. s.	d.	Per cent. of gross receipts.
Jan. 31, 1875	6	8¼	4	11¼	74.38
Jan. 31, 1876	5	7	3	11¼	70.99
Jan. 31, 1877	4	9	3	8¼	78.11
Jan. 31, 1878	5	2¼	3	3¼	93.19
Jan. 31, 1879	7	11¼	3	2¼	64.84

The Proprietors were informed, at the general meeting in October last, that it was the intention of the Directors to reconsider, at an early date, the position and basis of the various reserve funds. Aided by detailed reports from the Accountant of the company and the officers in Canada, the Board have arrived at conclusions on this subject which are now explained. The alterations take effect from the 1st August, 1878, and the accounts of the present half year are accordingly rendered on the revised basis.

RAIL AND BRIDGE FUND.

The rail fund now includes in its operation the London, Huron, and Bruce, and the Brantford, Norfolk, and Port Burwell lines; and making due provisions for the material required to replace the whole of the iron rails now in the track with steel, and the renewal of steel rails on the whole system, spread over a period of 14 years from the 1st August, 1878, it is estimated that an average half yearly charge to revenue of £17,980 will be amply sufficient. This amount included the reduction of the value of old rails in stock to present market prices. When the rail fund was first established, there was a considerable difference between the price of steel and iron rails, and the original estimates were based upon the assumption that the increased cost of renewing iron rails with steel would be charged to capital. As however, there is at present but little difference in the prices of steel and iron rails, no charge to capital on that account is now made, and the revised estimates have therefore been framed on a purely revenue basis. It is proposed to amend the estimates upon which the bridge fund was originally framed, but the Directors concur in the recommendation of the Chief Engineer to extend the operations of this fund over a period of 30 years from the 1st August, 1878. Including the cost of renewing in stone and iron, the wooden bridges on the London, Huron, and Bruce, and Brantford, Norfolk and Port Burwell lines, an average half yearly revenue charge is estimated to be required of £4,990. These amounts it is computed, will be provided by a train mileage rate of 3.89 cents for rails, and 1.08 cents for bridges.

LOCOMOTIVE FUND.

The amount at the credit of this fund on July 31, 1878, was £120,944. This sum is estimated by the locomotive superintendent to be more than sufficient to supply, at present prices, new boilers and fire boxes for the entire stock of engines, and it is proposed to confine the outlay from the fund to those purposes, charging all other renewals to revenue half yearly as incurred. Further credits to the locomotive fund are therefore unnecessary for the present.

CAR FUND.

When the basis of this fund was revised in 1876, the average annual renewals were estimated at 5 per cent of the cost of replacing the entire stock. From the experience of the working of the fund since then, and taking into consideration the low prices of materials and wages, the car superintendent reports that the yearly charge for renewals, from August 1, 1878, may be safely reduced to 4 per cent, and this modification has been adopted. In the half years ended July 1877, and July, 1878, the actual expenditure for renewal of cars was charged to revenue. This charge being in excess of the estimated credits to the fund on the old basis, an adjustment has been made in the present half year.

FERRY STEAMERS FUND.

When this fund was remodelled on August 1, 1876, an annual sum of 1 per cent was credited for fire insurance. It is proposed to discontinue this charge, as the steamers are now insured to a sufficient amount against fire under the general insurance policy of the company. With this exception, no alteration is made in the yearly contribution to this fund, which is fixed at 7 per cent on the original cost of the boats.

FIRE INSURANCE FUND.

The property of the company being covered to a large amount against fire, under a general insurance policy effected with an English Company of good standing, it is considered unnecessary to increase the fund beyond the amount of $10 000 at its credit on January 31, 1879. Judging from past experience, this will be sufficient to meet all probable requirements. The balances of the funds on January 31, 1879, were as follows:

	Balance July 31, 1878.	Debit or credit during the half year.	Balance at Jan. 31, 1879.
Ferry steamers renewal fund	£15,547	£2,703	£18,250
Locomotive renewal fund	120,944	.....	120,944
Car renewal fund	44,297	Dr. 4,935	39,363
Rail and bridge renewal fund	23,536	4,034	25,570
Insurance fund	1,657	398	2,055
Leased lines suspense account	Dr. 48,202	180	Dr. 48,023
	£157,779	Cr. £2,380	£160,159

On 1st January last, specie payments were resumed in the United States, and consequently the loss by exchange (which has so materially affected the accounts of the company for many years past) ceased from that date.

CAPITAL ACCOUNT.

During the half year £53,300—5½ per cent matured bonds of the company have been paid off. Seven per cent bonds, to the amount of £11,700, have been exchanged for five per cent perpetual debenture stock. The total debt to capital account during the half year amounts to the sum of £32,702. On Jan. 31, 1879, it will be seen that the capital account was overdrawn to the extent of £40,004, but this sum together with the necessary outlay on account of stores, &c., is being temporarily met by the balance at credit of reserve funds, amounting to £160,159.

LEASED LINES.

The loss on working the leased lines, including the rent of the Welland railway, amounts as per Abstract G, to £15,674, being £1,799 in excess of the corresponding half year. This includes a charge for the Brantford, Norfolk, and Port Burwell railway, but as the connection with the loop line was not completed until December last, the result of this half year's working affords no criterion of the future of this railway. The arrangements announced in the report for the half year ended 31st January, 1878, and approved by the shareholders of the general meeting on 30th April, 1878, for working Galt and Guelph railway as a part of the Great Western system, have now been satisfactorily completed, and in future the revenue account of this line will be incorporated with that of

the main line and branches. The sum of £3 000, being the equivalent of 20 per cent of the half year's earnings on additional traffic interchanged with the Wellington, Grey, and Bruce railway will, under traffic agreements, be applied to the acquisition, on 1st April, 1879, of the bonds of that company at par. A sum of £1,582 has been debited to "Leased Lines Suspense Account," being the expenditure during the half year in completing the renewal of bridges on the London and Port Stanley line, which (as explained in the previous reports) will be charged to revenue over the remaining period of the lease.

BRANTFORD, NORFOLK, AND PORT BURWELL RAILWAY.

With the sanction of the shareholders, this railway is in course of completion, under the guarantee, as to interest on its bonds, by the Great Western Company. Instead of placing all these bonds on the market, it may be more economical for the Great Western Company to hold a portion of them, and provide the requisite capital from its own resources.—A resolution to this effect will be proposed.

DETROIT, GRAND HAVEN AND MILWAUKEE RAILWAY.

It was announced in the last half year's report, that the reorganization of the former Detroit and Milwaukee railroad was then in progress. A Provisional Board of Directors was elected in November last, the staff appointments were arranged, and provision was made for working the traffic. The net earnings of the road since that period have been fairly satisfactory. Under the authority given by the shareholders on 30th April, 1878, a temporary advance of funds has been required to complete the sale and transfer of the road. As soon as the difficulties inherent in transactions of this magnitude are overcome, and the road is sufficiently equipped and organized, the Directors believe that the Great Western Proprietors will not regret having given their sanction to the arrangements for working this railway.

RELATIONS WITH NEIGHBORING COMPANIES.

The Directors desiring to confer with Mr. Broughton and the officials of the company in Canada, on several important matters now pending in connection with the Great Western's relations with neighboring companies, and especially with reference to the division of traffic with the Canada Southern railway under the Scott award (with the working of which they are not satisfied), the vice president, accompanied by Mr. Lindley, the accountant of the company, proceeded to Canada in January last. On his return, the Directors were put in possession of information, which will be of great value to them in arriving at the decisions which must now be taken. The Board believes that they may rely on full confidence being placed in them by the shareholders with reference to these decisions. On behalf of the Board of Directors,

HUGH C. E. CHILDERS, President.

London, 18th April, 1879.

Leadville, Colorado.

Ten thousand feet above the level of the sea, where snow falls every month of the year, and the barren soil refuses to produce the commones' necessities of life, stands the town of Leadville. This wonderful evidence of the frantic enthusiasm with which man will prosecute the search for gold, is a town of nearly twenty thousand inhabitants supplied with an abundance of every material requisite for mining enterprise, including the rich mass of metallic ore in whose centre it lies, daily and weekly newspapers, capital in any quantity poured into it by Eastern speculators, and, last but not least, a Mining Exchange where gambling in the shares of its mining companies is carried on with a vigor that shames even the bulls and bears of San Francisco.

Leadville, as we now find it, dates its creation from August of last year, when the value of the carbonate deposits on which it stands began to be appreciated.

Since that time eighteen thousand miners, prospectors, speculators, dealers and adventurers have tramped or ridden into it over the one hundred and twenty miles of hill and valley that lie between it and Denver.

Twenty years ago California Gulch in which Leadville lies, was a gold mining camp, and placier digging there yielded many millions until the placiers were worked out. The place was then abandoned until Mr. W. H. Stevens of Detroit and a few other mining men of greater penetration than their fellows, formed the idea that silver mining in the District might prove productive.

The existence of the deposits scientifically described as "carbonate" had long been known. The gold diggers called it mud and used it to fill up the interstices of their log huts, but the idea that this soft earth which underlaid the surface soil in large sheets like pancakes, bore silver in large quantities, never entered their imaginations. When, however, the real worth of the hitherto despised sheets of soft dirt was demonstrated, and it was found by actual working that these layers of carbonate carried from 100 to 800 ounces of silver in every ton, a rush was made for the country that has had no parallel since the earlier pioneer days of California.

A peculiar feature of the deposits, adding much to their mining value, is the ease with which the carbonate can be extracted. The largest masses have been found at depths varying from 40 to 140 feet, a point where quartz mining may be said to begin. The expense of getting the carbonate out is a minimum, as blasting is seldom required; $2 per ton is the average cost.

The fortunes made by some of the fortunate miners during the last six months have been on the grandest scale. An able correspondent of the Evening Post, writing from Leadville, states that "a small grocer 'grub-staked' a hungry miner who struck mineral in a couple of weeks; the grocer bought out the miner, sold a small interest in his mine for a fortune, bought other mines, made money out of all of them, and is now Lieutenant Governor W. A. Tabor, President of the Bank of Leadville, whose income is reckoned in millions."

There are now 49 paying mines at Leadville and 28 smelting establishments. Town lots sell for $1500 each. Three railways are laying track to reach the district, namely, the Colorado Central from Georgetown; the Denver and South Park from Webster, and the Atchison and Santa Fe from Canon. Some thousands of men are employed in grading these lines and each of the three expects to reach Leadville this summer.

The carbonate deposits rest on a limestone foundation. The Judge Pendry mine, after piercing the first deposit, sunk to a depth of 360 feet and found a second layer immensely rich, parts assaying 14,000 ounces to the ton. It is believed that other strata will be found still lower. The estimated yield of silver from Lake County for this year is $11,000,000 at the lowest.

The Little Chief Mine, managed by T. H. Holt, raises a hundred tons of ore daily, employing 200 men. Their works will shortly be able to smelt 40 tons daily. The Crysolite and Carboniferous mines belong to Borden, Tabor & Co., and work 90 hands. The Evening Star of New York is managed by Mr. D. S. Ward, the Vice President. It has a shaft 189 feet deep, and its ore assays up to $150, but none has yet been milled. Ulysses S. Grant, Jr., has bought an interest in this company from Governor Routh its promoter and former owner. The Morning Star is another undeveloped concern in strong hands. The Cresent is a New York property, turning out ten tons daily, of which six tons are lead and one hundred pounds silver. The Leadville or Carbonate mine, whose dividend notices we are pleased to say are seen monthly in the columns of the Journal by its readers, is in a state of magnificent development, having four levels, two running north and south, and a double track, well timbered incline, nearly 300 feet down. All of the levels are running in ore veins some of which are five feet in width. Mr. John J. Vandemoer, the able correspondent of the Mining Record, furnishes that well informed Journal an interesting description of the property and locality to which we acknowledge our indebtedness. 80 men are employed on the mine, who are making extensive developments besides raising a large body of ore. The average mill returns on fifty tons of this, last month, were $250 per ton.

Kerite.

The use of the "Kerite" manufactured by Mr. Austin G. Day, of No. 120 Broadway, New York, for the insulation of telegraphic conductors and cables, will be found by railroad managers the surest economy. The first cost of Kerite is slightly greater than that of gutta percha, but its durability is more than three times as great, and its capacity to resist all atmospheric influences and the action of gases, especially sewer gases, and all analogous deteriorating agencies, cannot be approached by gutta percha or any other insulator. Consequently railroad companies requiring insulated telegraphic conductors to be run through tunnels, or under water or under ground, will find in the Kerite an insulator which will last unimpaired for twenty to thirty years, and save many times over the cost of any other system.

It has been employed in the Chicago River Tunnel more than ten years and is to-day as perfect as when first put there, and practical electricians say that its use in that tunnel is one of the severest tests to which any insulator can be subjected.

It has been adopted by the United States Government, the Pennsylvania Railroad, the New York Central and many other prominent roads.

☞ J. D. Watson and others, representing a company of Boston capitalists are interesting themselves in a project for the extension of the Chesapeake and Ohio railroad from Huntington, West Virginia, its present terminus, to Cincinnati. This road is destined to become the fifth great trunk line from the East to the West, and in the future will do much to build up the prosperity of Virginia. The new company is fully organized, under the name of the Chesapeake, Ohio and Cincinnati railroad, and owns large quantities of mineral lands in West Virginia.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An Asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

The asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained."
Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "‡."

AMERICAN RAILROAD JOURNAL.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

P. W. HARDING & CO.

The co-partnership notice which will be seen by our readers in another column intimates that Mr. HENRY T. CHAPMAN, Jr., is now associated with Messrs. P. W. Harding & Co., as an active member of that well-known and highly esteemed Banking and Broking firm.

Mr. Chapman has long been favorably known to our business community as an enterprising and able financier. As cashier of the Oriental Bank he discharged the duties of that responsible position with an efficiency that attested his qualifications for entering into a business which would allow a wider scope for his ability. He brings with him in his new sphere the friendship and good wishes of a large circle.

We understand that the business of the firm has increased so much of late that the senior member, Mr. P. W. Harding, has absolute need of the efficient assistance which his new coadjutor will be able to afford him. It is no idle compliment to say that Mr. Harding has, unassisted, built up a business which now overtaxes even his energy to attend to without assistance, and that his high reputation and popularity are due to a long and well tried experience on the floor of the Stock Exchange and to the uniform success which has attended those who have put their business in his charge.

Mr. GEORGE H. STAYNER is the Special partner of the firm, which, with the addition of Mr. Chapman to its membership, enters upon an era of renewed business activity with a pecuniary stability and individual strength which has very few superiors among our Wall Street institutions.

☞ The steamer George Leary, formerly a favorite in the Steam Packet Company, and which has been thoroughly overhauled and renovated so as to be as good as new, is running in Plant's line from Washington to Norfolk, Portsmouth and Fortress Monroe. Connections are made with the trains of the Baltimore and Ohio and Baltimore and Potomac railroads at very reasonable rates of fares. Passengers who leave Baltimore in the afternoon make close connection with the Leary at Washington, and after a comfortable night on the Potomac reach Norfolk at a seasonable hour next morning.

☞ Work is soon to be commenced again on the South Mountain Railroad, which is to extend from Harrisburg to Boston, passing through Dauphin, Lebanon, Berks, Lehigh and Northampton counties in Pennsylvania, Warren and Sussex counties in New Jersey, Orange and Ulster counties in New York, and terminating at Poughkeepsie, a distance of 190 miles. At this point by bridge it will connect with all the principal lines of railroad leading into the New England States.

☞ The decree entered in the United States Circuit Court at Norfolk, Va., on the the 8th inst. recites that unless the Atlantic, Mississippi and Ohio Company shall, on or before the second Tuesday in January, 1880, pay the plaintiff's trustees arrears of interest a master commission will be appointed to sell the right, title and interest of the Atlantic, Mississippi and Ohio Company in the three roads extending from Norfolk to Bristol, Advertising, &c., is required by the deed of September 9, 1871, for ninety days.

Philadelphia Stock Exchange.

Closing Prices for the week ending May 13.

American Railroad Journal.

Saturday, May 17, 1879.

Financial and Commercial Affairs.

From legitimate business interests, the report is of increasing activity, with a comparatively firm range of values, enabling merchants and traders generally to view the future much more confidently. Crop and weather reports are, this week, more satisfactory, but their influence on the produce markets is at least partially offset by the decided development of speculation, especially in Wheat, which, here and in the interior, has been advanced sharply, to the serious hindrance of the outward movement, though the advices by cable are of a more favorable tenor. Cotton, at present, is practically under speculative control, thus affecting operations for home use and shipment. Money, in the local market, is in very liberal supply, and though more inquiry is noted for accommodation from mercantile, as well as speculative sources, the more important requirements of borrowers, in good standing, are very promptly provided for, at current low quotations. Foreign reports are of continued ease in Money, and a more liberal volume of dealings, in financial and commercial lines. London advices quote Money as very abundant there at 1@2 per cent, with investors and speculators represented as alike eager to purchase freely at the Stock Exchange whenever an opportunity presents itself. British and American railways are reported as generally and decidedly higher. The chief variations in reliable government securities are likewise favorable. The City Bank exhibit of last week indicated an enlargement in the loan and discount average of $3,583,800, and in the item of circulation of $4,900. The average of deposits

was enlarged $10,605,500. The legal tender reserve was augmented $4,186,200 (or to $53,576,700); and the specie average $229,400 (or to $18,745,600.) The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $19,688,000, against $14,873,775 the preceding week, or a further gain of $1,714,225. The City bank exchanges in currency reached $591,290,771, or a daily average of $98,548,462. Call loans have been quoted at 1½@3½, generally at 2 @3 per cent, on the pledge of Stock or mixed collaterals (in the instance of Government securities, however, ranging as low as 1½), and best discounts at 3½@5 per cent per annum.

The outstanding amount of legal tender notes is $346,742,631. The National bank circulation is now $327,683,416 of currency notes and $1,466,000 of national gold bank notes. National Bank notes received at the Treasury Department last week for redemption were to the amount of $3,149,000. The amount of United States bonds deposited with the U. S. Treasurer at Washington for circulation during the week was $9,918,050. And of United States bonds held for circulation withdrawn during the week $10,047,500. The Treasury Department now holds $352,131,100 in United States bonds to secure the outstanding national bank circulation.

Government securities have been quite active at firmer prices closing throughout strong. The new Four per cent bonds have been very freely purchased by investment buyers, chiefly in the home interest. In the English and Continental markets, this loan is gaining rapidly public recognition, as a perfectly trustworthy and productive medium of investing savings, for the sake of assured income. A brisk inquiry has been noted for the new 4 per cent certificates of deposit which have been marketed as readily as offered through the designated agencies. At the close on Wednesday the current quotations for the various issues were as follows:

United States 6s, 1880, registered, 106⅝@106¾; do. coupon, 106⅝@106¾; 6s, 1881, registered, 107@107⅛; do. coupon, 107@107⅛; 5 per cents, 1881, registered, 103½@103¾; do. coupon, 103½@103¾; 4½ per cents, 1891, registered, 105⅞@106; do. coupon, 107⅛@107¼; 4 per cents, 1907, reg., 102⅜@102½; do. coupon, 102⅜@102½; sixes, currency, 124@125.

In the line of favorite State loans, a fairly active movement has been reported chiefly on investment account with prices showing, in prominent instances, a further rise for the week, though variable. Railway Mortgages of the leading interest bearing issues have been quite freely taken by investment buyers at much stronger prices, though fluctuations have been of frequent occurrence, due, in part, to sales to realize the advantage of the recent marked improvement. In the line of Railway and Miscellaneous share property the business of the week has been to a respectable aggregate (though less extensive than through the preceding week) the general inquiry having shown considerable spirit, encouraged by the favorable position and outlook of commercial and industrial interest, and the brightening prospects for the great railway carriers. The dealings reached on Thursday of last week an aggregate of about 176,000 shares; on Saturday of about 128,000, and on Monday of the current week, 130,000 shares, followed on Tuesday by a total of nearly 147,000 shares. The much lighter range of values recently has tended, somewhat to check operations. Some wide fluctuations have been noted, due mainly to speculative influences. On the later dealings, however, the market showed a buoyant temper.

In the Gold line, an uninteresting business has been reported. The specie outflow last week was only $298,529—making the total exports of specie hence since January 1, 1879, $7,155,311 against $7,603,690 the same time in the preceding year. The imports of specie at this port last week were to the amount of $258,479, and since January 1, 1879, have been $3,913,426 against $11,257,228 same time in the preceding year. The Customs drain for gold in the local market reached $2,044,343 or an average of about $340,724 per day.

Foreign Exchange has been in moderate request but quoted generally much firmer on quite moderate offerings of prime bills. Bankers' sixty day bills on London closed at $4 87¼@$4 88; sight bill on London at $4 88¾@$4 89½ to the £ sterling. Cable transfers, $4 89¼@$4 90. The week's imports of Dry Goods and general merchandise were to the specie value of $6,135,228 as against $6,489,095 the corresponding week of 1878. The week's import entries of Foreign Merchandise at New York included $1,039,919 of Dry Goods, and $5,095,209 of General Merchandise. The week's exports of Domestic Produce and Miscellaneous Goods from this port were to the aggregate value of $5,908,390 against $6,298,686 same week 1878, making the total exports of produce since Jan. 1 this year $115,400,308, against $126,632,598 same period in 1878, and $96,353,479 in 1877.

Produce and Merchandise have been in generally good demand and prices, in several instances, have shown more firmness, though variable. Breadstuffs, Provisions, and Cotton have been the prominent features of interest. The speculative dealings in Wheat, Cotton and Lard have been extensive and at higher figures. Wheat closed on Wednesday 1½@3cts. under the highest prices reached, on that day, under a pressure to sell, chiefly speculative, the Western market also yielding sharply. Corn left off more firmly. Rye continued very brisk for export at advanced rates. Dry Goods have been more freely purchased at stronger prices, closing firmly. Cotton has been actively sought after in the option line at generally buoyant prices though leaving off tamely. Early deliveries quiet. Low Middlings closed for prompt delivery at 12 3-16@12 5-16; Middlings at 12½@12⅝. Options left off for May basis of Middling at 12.54@12.55; June at 12.66 @12.67; July at 12.84; August at 12.63@12.64; September at 11.85@11 86; October at 11.43@11.44; November at 11.43@11.44; December at 11.33.

Naval Stores have been in rather better demand at about previous prices. Petroleum has been moderately active and closed steady.

Foreign merchandise has been quoted generally firm, on a fair inquiry.

A generally firmer range of values has been noted in the line of Metals, on lighter and less urgent offerings of the leading kinds, with a good inquiry reported, especially for American Pig Iron, Steel and Iron Rails, and common domestic Lead. Pig Iron quoted for Glengarnock, at $20 50@$21 50; Coltness, $21 50@$22 50; Eglinton at $19 50@$21 50; No. 1 American Pig at $17@$20 as to brands; No. 2 do. at $16@$18 50. Forge, $15 50@$16. New Iron Rails $35@$36 50. Wrought Scrap, $24. Steel Rails wanted and quoted on the basis of $43@$46 at the mills and at tide water. Old Iron Rails quoted at $20 75@$21. Ingot Copper in fair request with Ingot quoted at 16@16⅛cts. Tin moderately active at former quotations. Domestic Pig Lead attracts much more attention, chiefly from speculative buyers, who took about 3,800 tons at 3cts. per lb., but quoted at the close at 3⅛@3¼cts.

Business in the line of Ocean freights has been fairly active, with rates on berth showing more firmness, and in the way of charters, ruling about steady. The main call for tonnage has been for Grain, Petroleum, Lumber, Coal, and general cargo. The protracted strike of the longshoremen seriously impeded the loading of vessels, causing much trouble and annoyance to the steamship lines. Liverpool steamer rates at the close for Grain quoted at 4¾@5d. per bushel. Flour, at 2s. 3d.@2s. 6d. Provisions, 22s. 6d@27s. 6d; Butter and Cheese 30s.@32s. 6d.; Leather, 35s.@40s. Measurement Goods 20s.@25s. per ton; Cotton, 3-16d.@¼d. per lb. Tobacco at 30s. Liverpool, by sail: Cotton, 3 16@13-64d. Grain at 5@5¼d. per bushel; Flour, 1s. 9d.; Measurement Goods, 12s. 6d.@15s. Tobacco 25s.@27s. 6d.; Oil Cake at 15s.@17s. 6d. Provisions for the Continent by sail, 22s. 6d.@25s. and by steam at 25s.@35s. Grain rates on charter hence for Cork and orders left off at 4s. 6d.@5s.; for the Continent, Grain at 4s. 3d.@6s. 3d. as to ports of discharge. Tonnage for Refined Petroleum at 3s. 9d.@4s. 3d. to Cork, for orders; and at 2s. 9d.@3s. 3d. to the Continent, and 3s. 9d.@4s. 1¼d. to the Baltic. Through freight movements moderately active but at irregular quotations.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Denver and Rio Grande 1st, 97¼; Winona and St. Peter 2d, 104; Chesapeake and Ohio 1st, Series B, 41¾; do. 1st pref., 10¾; do. 2d pref., 7⅛; St. Louis, Kansas City and Northern Real Estate 7s, 1895, 102½; do., 1st Omaha div., 104; Hannibal and Central Mo. 1st, 105; New Jersey Southern R. ROBERT R. BAUER & CO.

The firm of Robert R. Bauer & Co. have opened a Stock, Mining and Cotton Exchange on the first floor of 34 New Street, which also opens at 38 Broad Street, where transactions are effected, sales and purchases consummated, and profits realized at all hours of the day. All business transacted by Messrs. Bauer & Co. for their customers is settled on the spot, and it is in the option of the purchaser or seller of stocks or cotton to hold as long as it suits him or to realize the profits on a change of quotation within five minutes after depositing his margin. No limit is placed to the amount of purchases or sales, and dealers and speculators in 10 or 20 share lots receive precisely the same privileges and advantages as the largest ones.

The extent of the daily business of the firm, and the throngs who crowd their rooms attest their popularity, and the frequent fluctuations that now take place every hour in the speculative class of stocks and cotton enable every one who desires to realize large sums on small investments through the medium of their Exchange.

☞ The engineers of the Grand Trunk Railway are surveying the route for the Norway Branch Railroad. The town of Norway, Me., voted $5,000 for the road, an individuals subscribe the balance required.

West Virginia (See Virginia.)					

The Green Mountain Mining Company.

On the western side of the fertile Indian Valley, whose rich crops are the pride of Plumas County, California, runs the well-wooded range of the Green Mountains. The foliage of gigantic oaks and stately pines cover the easy slopes of these hills with a perennial mantle of evergreen, and give them a just title to the name they bear.

At sixteen hundred feet above the bed of Indian Valley the crests of these hills are 4,500 feet above sea level; and then, falling with an easy sweep for two hundred yards, their western feet rest in another girdle of valleys through which flows a stream fed by the never-failing springs that gush from the mountain's side.

It is on this part of the range, where it overlooks Round Valley, that indications of gold were discovered some twelve or fourteen years ago. These were followed up, and became richer as the side of the mountain was entered, until at last the tunnel ran into a vein of gold ore of enormous size, which increased in value and magnitude the more it was explored.

Thus began a quartz mining enterprise which promises to be one of the most remunerative of its kind among Western mines, and to some account of which we now direct the special attention of our readers.

Shortly after the discovery and partial development of the mine, it was purchased by a party of local capitalists who continued to carry out the developments so successfully commenced. Among these gentlemen was Mr. H. C. Bidwell, a citizen of Greenville, which is a thriving town at no great distance from the mine.

Mr. Bidwell being a mining manager of considerable experience, was appointed manager, and under his charge the mine was developed to a most satisfactory extent—even without making allowance for the limited amount of capital and machinery that the resources of his associates were able to supply him with. This selection of the new manager was a fortunate circumstance.

It is not difficult, even for those unacquainted with mining matters, to understand how rapidly and fruitlessly large sums may be squandered by unprincipled and incapable superintendents, and how the finest natural advantages may be nullified by injudicious and self-interested management. The history of many mines, intrinsically rich, is that of disaster and ruin to the shareholders, where the superintendents have been ignorant and of bad faith, while the record of other mines shows a continuous list of good dividends based on ore worth less than six dollars a ton.

It was the good fortune of the Green Mountain mine to secure in Mr. Bidwell a man of the highest integrity, perfectly proficient in every detail, whether scientific or mechanical, of his profession.

The result, after twelve years of his superintendence in working the mine, is that the property is now in the highest state of development; that nearly a million dollars have been extracted from it for the benefit of its owners, and that a mass of ore in the interior of the hill has been brought to sight which no amount of mill power that can be provided could reduce into bullion, for the next twenty years.

The magnificent future which is open to this property, if adequate milling power be erected, has become so obvious to its proprietors, that at the request of several of their Eastern friends who share their convictions and are desirous of sharing in the enterprise also, it has been determined to raise the capital required in this market, and for this purpose the public are invited to subscribe for a limited amount of the stock, which is offered them at the price of $2 per share; the capitalized value of the mine at this rate being $250,000.

We have dwelt at some length on the past and present management of the property, deeming that point to be one on which investors cannot too thoroughly assure themselves before embarking their means in any enterprise which is not purely in their own control. This question being most satisfactorily settled, it now remains to be seen what is offered to the subscribers in return for their capital, bearing in mind at the same time that the mine itself without any improvements is worth four times the present subscription price of its stock.

In answer to this question we find that Mr. R. W. Wilson, United States Mining Surveyor for California, and a man of the most approved integrity and sound judgment, whose statements are always accepted as facts, has made a critical examination of the mine, and his report thereon embodies in substance the following particulars:

The property of the company extends from the foot to the summit of the hill, a lineal distance of nearly a mile, with an average width of six hundred feet, in addition to a large tract of valuable timber land.

At the base of the hill, and furnished with an ample supply of water, are the company's two quartz mills, one of 20 and the other of 12 stamps; boarding and dwelling houses, extensive sheds and stabling, and all the adjuncts of a large settlement which has grown up on the company's property during the last twenty years.

Ascending the hill we come to the mouth of the lower tunnel. This tunnel pierces the mountain to a depth of 1,000 feet, when it runs into the main ore vein for 400 feet more. Higher up, another tunnel runs into the same ore vein for 600 feet, and nearer the top of the hill are shafts sunk into the vein for a depth of several hundred feet from which various levels and cross cuts radiate. Winzes in these levels cut the ore vein into sections of many thousands of tons each, and enable an accurate estimate of the quantity and quality of the ore "in sight" to be made. This whole system of developments connects with a tramway meeting them at their lowest portion, and conveying the ore sloped from the various levels by cars running down the inclined plane, to the mills.

From first to last, all the work which necessitates the constant use of powerful and expensive machinery in other mines, is here done by gravity alone, and the outside cost of mining a ton of ore at the farthermost point and delivering it at the mills is estimated by Mr. Wilson at one dollar. These developments, then, include perfect freedom from water, thorough ventilation and easy access to all parts.

The size and character of the ore vein or veins now remain to be considered, and on this subject Mr. Wilson's report is most unreservedly explicit.

This vein, in place of being a comparatively thin string or leader of ore, as often happens, is a huge reef, varying in its upper portion from fourteen to twenty-eight feet in width, increasing in thickness as it descends, and underlying in longitudinal extension the whole length of the company's property. The average milling value of this enormous mass, over a million tons of which are "in sight," is estimated by Mr. Wilson at from six to ten dollars per ton, exclusive of the chimneys or chutes of richer quality, the whole giving an average which may be estimated at eight dollars per ton.

This brief survey will satisfy an enquirer that a mining property more prettily situated, or more thoroughly developed, is not to be found, and that the work done and improvements on the mine are actually worth far more than the proportion of $2 per share which it will cost him to become a joint holder.

The next and not least important point for his consideration is: what dividends are likely to accrue from present and prospective working capacities. On this matter the testimony is equally explicit. With the present facilities the mine can readily return a hundred thousand dollars net annually, which is the equivalent of 40 per cent. interest to the stockholders on their investment. The addition to the milling power which the company contemplates making will increase the profits and the dividends to at least double that amount and probably to a far greater extent.

It will be unnecessary to follow Mr. Bidwell or Mr. Wilson through the figures they give to prove what handsome returns the shareholders may reasonably expect.

We have now before us the report of a mine in the same county, working on a grade of ore less valuable than that of the Green Mountain, and with developments which cannot compare in many respects with those made by Mr. Bidwell. This is the Sierra Buttes Mine, owned and operated by an English company. This concern, with all its disadvantages, foreign organization included, has just paid its shareholders an 8 per cent. dividend on a capital of $1,250,000. It will not be pretended for a moment that the management of the Green Mountain is in any way inferior to that of the Sierra Buttes, and as the ore of the former is from two to three dollars per ton richer than that of the Buttes the dividend of the Green Mountain on the same capital as that of the Buttes would be about 40 per cent. But inasmuch as $2 per share makes the price to the purchaser only one-fifth that of the Buttes, his dividend should amount to five times more or 200 per cent. annually. This comparison between the two mines is thoroughly justifiable, and may be studied with advantage by all who want to know whether working low grade quartz ore in California can be made to pay. We have no hesitation in saying that under the same management which the Green Mountain Mine has been enjoying for the last ten years, it will pay those who contribule to the small additional capital required for mere milling power, a minimum annual return of two hundred per cent. for their investment.

The mine has a well earned reputation, and is not a prospect. The owners and managers have had valuable experience, and success with them is the constant aim.

The office of the company is at 54 Broad Street, with L. P. Bayne & Co., agents of the Plumas National Quartz Mining Co.

MINING.

The DUNDERBERG MINING COMPANY has just been organized at 62 Broadway, with the following board of Trustees and officers: J. Warren Brown, President; Chas. Dennis, Vice President; Walter T. Hatch, Treasurer; H. S. Bradford, Secretary. Trustees: J. Warren Brown, Chas. Dennis, Thos. S'ocum, Emery Thayer, Geo. H. Morrison, S. B. Elkins, Walter T. Hatch, C. E. Quincey, E. S. Mills, Hiram Dewing, H. H. Dunckiee. We learn that those shares of this company which were appropriated for Boston are all taken up, and that those for this market have all been absorbed by the public. A glance at the names in the company's Directory, quoted above, will fully explain the confidence of our citizens.

A recent dispatch received by Mr. Dunckiee, the Secretary, from Georgetown, states that the yield of the mine for last month was 20,000 ounces of silver.

The great Holden-Ford mining suit, which involved several million dollars, has been settled in Cleveland. The mine has been sold to French capitalists, who pay Holden $1,000,000 and Ford and others $200,000.

BODIE DISTRICT.—Recent advices from this magnificent mining district confirm the belief that the ore deposits there are as illimitable as they are rich.

The Standard Consolidated Mining Company paid its regular monthly dividend of 50c. per share on the 12th inst. at the agency of the Bank of Nevada. The shipments of ore during the month of April amounted to $102,000, which leaves a surplus of $52,000 to go to the reserve fund after paying the dividend. Despatches from the Bodie district report as follows: "The Standard north drift from the new shaft is all ready, run just 200 feet; the ledge looks fine and averages five feet wide all the way. It assays on an average throughout $100 to $150 per ton. The vein in Cook winze is in three feet of very rich ore. The Bulwer has made connection between north drift on Stonewall 380 level and the winze from 200 level. The vein averages 2½ feet of very rich ore. Vein in south drift 300 level, gives three feet good milling ore and looks well. Bodie continues to look well; drifts progressing; will commence sinking new winze in 700 foot level." The tunnel had advanced 920 feet on April 29, and was cutting through a blue birdseye porphyry formation.

The Vandewater Mining Company has lately been organized to work the old Eagle Mine in Spring Valley, Humboldt County, Nevada. The ore in this mine is free milling, and runs about $20 to the ton. A fifteen stamp mill is ready to work, and the enterprise should be successful. Mr. W. P. Pierce is the Superintendent.

FINDLEY.—The special correspondence of Trask & Francis' Mining Circular, states that Col. Hand, the manager of the Findley, recommends the erection of an entirely new outfit of 40 stamps, as the expense of repairing the present mill of 24 stamps, and adding thereto, would be greater than an entirely new mill. The fact of this mine having paid a dividend out of its legitimate earnings is an earnest of what may be expected when it is fully equipped.

SILVER NUGGET MINE, ARIZONA.—The San Francisco Stock Report says of this mine: "The facts are that it is very rich in Silver. D. G. Chilson, the locator and the boy who brought it to New York, has taken out between $65,000 and $70,000. For instance he sold at different times in San Francisco 284 sacks of ore for which he received $326 22, some of it as high as $8,074 a ton. Of course this is of the very best but besides what he has sold and worked it is estimated by good judges that he has 900 to 1000 on the dumps that will run from 90 to 100 dollars a ton.

The work has all been done by six or seven men and in not over six months time. It will be seen by this that the mine is by no means a wild cat."

The Stock Report in the above, reproduces our language of two months ago. A company to work this valuable property is now organized in this city with a strong directory, which includes Mr. D. G. Chilson himself in its number. It is Mr. Chilson's intention, as soon as the necessary preliminaries are effected, to start at once to the mines from whence he will send 40 or 50 tons of ore now in the shaft, for treatment here.

The hundred thousand dollars which will be the probable value of this shipment will be a more satisfactory and practical evidence of the value of the mine, than any prospectors could give. An invitation to join the company, issued under such auspices will be readily responded to by our capitalists.

The Calumet and Hecla Mining Company, of Michigan, has duplicated an order with the Hazleton shops for the manufacture of 175 tons of 15-inch bore iron tubing, for carrying compressed air into their mines.

It is reported that lead ore of fine quality has been discovered on the farm of John T. Hill, in Carroll county, Md.

The Homestake Mining Company has declared its dividend (No. 5) for April—30 cents per share—payable at Wells, Fargo & Co.'s on the 26th inst. The product of the mine for twenty days in April was $52,000.

A certificate of incorporation has been filed with the Secretary of State of Ohio of the St. Mary's Silver Mining Company; mines in Lake county, Colorado; office in Cincinnati. Capital stock, $500,000.

Rich silver mines are reported to have been discovered in Indian Territory near the Kansas line.

No Fear in San Francisco.

Two new California corporations for mining are: the Hermit, with a capital of $6,000,000, and the Union Exchequer, capital $5,000,000.

The incorporation of these two companies, and the active preparations making for launching other schemes upon the market in San Francisco, are unmistakable evidences that the outcry against the new constitution, which has just been adopted for the State by popular vote, is not altogether justified by results. To overtax large and successful corporations is too often the aim of the misled and ignorant mass of voters who constitute the majority in all our States, and who are omnipotent at the ballot box when the better informed minority are injudicious enough to allow a concentration of attack against accumulated property. Intelligence and wealth, however, are always dominant in the long run in every country, and in none more so than in California, where the penniless adventurer of to-day may be the millionaire of to-morrow. Whatever the defects of the new Constitution, and the injustice contemplated by its promoters, they are not so severe or so irreparable but that capital will still flow into the country, and enterprise continue to find a secure and profitable home in the Empire City of the West.

MR. WM. O. M'DOWELL.

Vitality, ability, experience and a constant readiness to meet an inquirer half way, are the characteristics which have secured Mr. WM. O. M'DOWELL, of 17 Cortlandt St., the support and friendship of a large circle of our business citizens.

In the Banking and Stock Broking business, which Mr. M'Dowell has followed for many years with success and profit both to himself and to his principals, he has made a specialty of the best class of investment securities, and his special information in this matter is invaluable to those who have not decided in what form to appropriate their capital.

The New Jersey and Oswego Midland securities now afford large margins for profit, due to anticipated combinations; and as Mr. M'Dowell has given these his particular attention, those desirous of investing in or selling them will find it advantageous to transact their business with him.

☞ The special train consisting of an engine, baggage car and two Pullman coaches of the Chicago and Northwestern Railway, which conveyed Mr. Wm. H. Vanderbilt and party to Omaha on the 1st inst., left Chicago at 7.07 A. M., and arrived at Omaha at 6.22 P. M., the distance being 491 miles. This beats Jarrett & Palmer's transcontinental train time in 1876 by seven minutes. The usual running time between Omaha and Chicago is about 23 hours.

☞ The gross earnings of the Great Western Railway of Canada for the month of March, 1879, were $330 200, the working expenses $235,900, and the net earnings $94,300; for the month of March, 1878, the earnings were $329,500, the expenses $268,100, and the net earnings $61,400—showing an increase in earnings of $700, a decrease in expenses of $32,200, and an increase in net earnings of $32,900.

☞ The new Pennsylvania State Loan for two millions of dollars, to run fifteen or twenty-five years, at the option of the State, is to be issued bearing interest at five, four and a half or four per cent, to be determined when the bids are opened, June 10. The bonds will be dated August 1, interest payable semi-annually.

☞ The Pittsburg, Virginia and Charleston Railroad has been leased directly to the Pennsylvania Railroad Company, and hereafter the officers of the leased road will report to the general agent at Altoona. The new arrangement will go into effect this week.

☞ At the annual meeting of the Iron and Steel Institute, in London, on the 7th inst., the Bessemer medal was awarded to Peter Cooper, of New York.

☞ Work has been begun on the narrow gauge railroad from Etna to Allegheny. The contract price is $40,000.

☞ A short branch railroad, connecting West Chester, Penn., with the Chester Valley railroad, is about to be constructed. This will give West Chester two outlets by rail to Philadelphia, and direct communication with the Schuylkill Valley and the coal regions.

The Coal Trade.

The total tonnage of anthracite coal from all the regions for the week ending May 3d, as reported by the several carrying companies, amounted to 461,744 tons, against 313,292 tons in corresponding week last year, an increase of 148,452 tons. The total amount of anthracite mined for the year is 6,978,976 tons, against 3,889,710 for the same period last year, an increase of 3,089,266 tons. The quantity of bituminous coal sent to market for the week amounted to 44,067 tons, against 74,675 tons in corresponding week last year, a decrease of 30,608 tons. The total amount of bituminous mined for the year is 929,971 tons, against 878,421 tons for corresponding period last year, an increase of 44,550 tons. The total tonnage of all kinds of coal for the week is 505,811 tons, against 387,967 tons in corresponding week last year, an increase of 117,844 tons, and the total tonnage for the coal year is 7,901,947 tons, against 4,768,131 tons to same date last year, an increase of 3,133,816 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the last two days of April was 39,156 tons, of which 28,978 tons were coal, and 10,178 tons coke. The total tonnage for the year thus far has been 1,801,476 tons, of which 1,401,132 tons were coal and 400,344 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ending May 6th were 35,826 tons, and for the year to that date 415,947 tons, an increase of 68,817 tons as compared with the corresponding period of 1878. The shipments to the Baltimore and Ohio Railroad for the week were 16,962 tons, for the year 284,477 tons, an increase of 10,483 tons, as compared with 1878. The shipments to the Pennsylvania Railroad were, for the week, 3,290 tons, for the year 54,894 tons, an increase of 26,954 tons as compared with last year. The shipments by the Chesapeake and Ohio Canal for the week were 15,573 tons, and for the season 77,575 tons, an increase of 31,379 tons as compared with last year. The Reading Railroad Company reports a coal shipment for the week ending on Saturday evening last of 177,500 tons, of which 64,000 tons were sent to Port Richmond, and 62,300 tons were shipped thence. The receipts at Perth Amboy for the week ending May 3 were 37,560 tons, and the shipments 39,500 tons, leaving a stock on hand of 150,340 tons.—*Phila. Ledger, May* 12.

Redemption of Five-twenty Bonds.

The following notice to holders of five-twenty bonds of the United States maturing after July 1, 1879, was issued on the 12th inst.:

TREASURY DEPARTMENT,
WASHINGTON, D. C., May 12, 1879.

Notice is hereby given that the following described five-twenty registered and coupon bonds, consols of 1867 and 1868, embraced in the ninety-fourth, ninety-fifth and ninety-sixth calls, on which interest will cease on the third and fourth days of July next, will be redeemed at the Treasury Department, in Washington, on the first day of July next, with interest to the date of maturity of the bonds, namely:

Consols of 1867, coupon bonds—$50, No. 112,001 to No. 128,833, both inclusive; $100 No. 220,001 to No. 245,000, both inclusive; $500, No. 112,001 to No. 118,580, both inclusive; $1,000, No. 203,001 to No. 227,429, both inclusive. Registered bonds—$50, No. 3,251 to No. 3,279, both inclusive; $100, No. 23,701 to No. 23,829, both inclusive; $500, No. 11,561 to No. 11,588, both inclusive; $1,000, No. 44,601 to No. 44,732, both inclusive; $5,000, No. 16,451 to No. 19,266, both inclusive.

Consols of 1868, coupon bonds—$50, No. 1 to No. 15,902, both inclusive; $100, No. 1 to No. 36,779, both inclusive; $500, No. 1 to No. 13,111, both inclusive; $1,000, No. 1 to No. 26,455, both inclusive. Registered bonds—$500, No. 1 to No. 2,087, both inclusive; $1,000, No. 1 to No. 7,088, both inclusive; $5,000, No. 1 to No. 1,816, both inclusive; $10,000, No. 1 to No. 2,613, both inclusive.

The usual semi-annual schedules for the payment of interest on the above named registered bonds will not be prepared as heretofore, but in lieu thereof the six months' interest due July 1, together with the interest from that date to the maturity of the bonds will be paid with the principal to the holders of the bonds at the time of presentation.

All United States bonds forwarded for redemption should be addressed to the "Loan Division, Secretary's Office," and all registered bonds should be assigned to "The Secretary of the Treasury, for redemption," and if bonds are transmitted several days prior to July 1 the necessary examination will be made at once and payment promptly made on the date mentioned. Where parties desire checks in payment for registered bonds drawn to the order of any one but the payee they should assign them to the Secretary of the Treasury for redemption, for account of—(Here insert name of person or persons to whose order the checks had been made payable).

JOHN SHERMAN, Secretary.

☞ The Pennsylvania railroad, in Maryland, has now made its connection with the Bedford division of the Pennsylvania railroad. Two miles of ties have been delivered and are being spread. The rails are on the road between Cumberland and Huntingdon.

☞ The earnings of the Wilmington and Northern Railroad in 1878 were $151,595, and the expenditures $147,909.

☞ The Avondale Street Railroad Company, of Cincinnati, has been incorporated. Capital, $100,000.

TO MINE OWNERS.

The New York Stock Exchange has at last opened its doors to the mining interest of our country, and now allows its members to deal in mining shares. Parties who have first class mining properties, and wish to organize companies, under the laws of the State of New York, which are liberal, and find a market, would do well to communicate with

WILLIAM EUCLID YOUNG,

(Member N. Y. Stock Exchange, also N. Y. Mining Stock Exchange.)

Office 60 Broadway, N. Y.

A. G. DAY,

MANUFACTURER OF

Kerite Insulated Telegraph Wire and Cables.

FACTORY, SEYMOUR, CONN.

THE DI-ELECTRICAL PROPERTIES OF KERITE have been thoroughly tested, and its superiority over all other kinds of Insulation fully demonstrated.

ITS DURABILITY

has been demonstrated beyond question in practical use of hundreds of miles of Kerite-covered wires by the Fire Alarm and Telegraph Companies. In New York it has been largely used for the last *ten years*, under all conditions and exposures; the resistance now is as great as when first exposed.

FACTS FULLY ESTABLISHED.

Kerite is not affected by extremes of heat and cold, or by exposure to the heat or sun; endures long continued heat below 200° Fahrenheit, may be safely immersed in boiling water, is unchanged by being placed in the ground; corrosive elements in the earth do not act upon it; acids act very slowly, only to oxidise the surface; bears exposure to not strong solution of alkalies; does not suffer by injury by destructive insects of land or water, and can be stored in tropical climes without change of insulation.

PROF. MOSES G. FARMER, says: "I have used your Kerite as leading wire, more or less for four or five years. It stands abuse, changes of temperature, alternate wetting and drying better than any insulator I have tried."

EMINENT ELECTRICIANS AND PRACTICAL TELEGRAPHISTS

commend and recognize the Kerite insulation as superior to all others.

GEORGE B. PRESCOTT, Esq., Electrician of the Western Union Telegraph Company, under date of September 25, 1874. says: "In September, 1869, we placed some of your Kerite wire, unprotected by any covering whatever, in the tunnel under the river in Chicago, and have since continued its use in that exposed situation with the most gratifying results. A portion of the tunnel is very wet, and water saturated with lime constantly drips upon the wires, while in other portions they are kept alternately wet and dry. which is well known to be one of the severest tests that any insulating material of an organic nature can be subjected to; and yet after five years' exposure under the above conditions, the Kerite covering shows no signs of decay or deterioration. An insulating covering of India-rubber or gutta-percha under a like exposure, would have been destroyed in much less time."

February 1, 1877, he writes further: "This piece of Kerite wire unprotected by any covering, was in use in the tunnel under the river in Chicago, from September, 1869. until December, 1876, and shows no signs of decay or deterioration in its insulating qualities."

For Sale by all dealers in Telegraphic Materials.
